

## Hangaring Service Charge

A charge shall be paid for the housing service of an aircraft in a hangar of the Airport Operator ABD (*subject to VAT 22%*), as well as for each single move of the aircraft in to and out of the hangar for the purpose of hangaring (*Italian & alien-pvt operator: No VAT §9.1,6 DPR 633/72; alien-comm. operator: No VAT § 7ter - revers charge*).

Only the Airport Operator may move the aircraft into and/or out of the hangar (an additional charge shall be applied); presence of a representative of the aircraft operator is desirable but not mandatory. The above applies also for moving in and out of the aircraft if deemed necessary by ABD Airport SpA (ABD).

The Airport Operator's claim with regard to this charge is due from the time of handing over the aircraft to the Airport Operator for hangaring.

Damage detected on the aircraft shall be announced to the Airport Operator in due course. The Airport Operator shall not be liable for any damage detected subsequently.

Any further regulations – especially for long-term hangaring – are set out in the ABD "Hangaring Regulations"
